## What are the safest email service providers for NGOs?

Apart from a few, none of these emails are completely secure. Select them based on your communication sensitivity.

# SAFEST COMMUNICATION TOOLS FOR NGOS

Tool	Encryption sensitivity	Data Privacy	Security Features
<u><a href="#">Riseup</a></u>	Riseup focuses on providing secure communication tools for activists and movements, with a commitment to user anonymity.	Committed to protecting user anonymity and privacy, Riseup does not log any personal information that can be tied to their users and removes logs regularly. They are known for their strong stance on not sharing data with third parties unless legally compelled.	Includes VPN services to further protect the privacy of its users online. Riseup also provides 2FA for its services, adding an extra layer of security for account access.

Tool	Encryption sensitivity	Data Privacy	Security Features
<u><a href="#">Autistici/Inventati (A/I)</a></u>	Recommends the use of PGP for end-to-end encrypted email communication. Their services, inclusive of email and web hosting, support SSL/TLS encryption for data in transit.	Highly committed to user privacy, not tracking or profiling its users. They offer services with the intention of minimal data retention and ensuring user anonymity, aligning with their activism and community support principles.	Services are tailored for activists and those concerned about privacy, providing anonymous browsing services through VPN and TOR integration.

# SAFEST COMMUNICATION TOOLS FOR NGOS

Tool	Encryption sensitivity	Data Privacy	Security Features
------	------------------------	--------------	-------------------

## ProtonMail

Offers end-to-end encryption for emails, ensuring that only the sender and recipient can read the content.

Utilizes zero-access encryption, meaning even ProtonMail cannot access the contents of your emails.

Operating under Swiss privacy laws, ProtonMail's servers are located in Switzerland, known for its strong privacy protections.
